## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 17, 20, 22, and 25-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Admitted Prior Art (AAPA) in view of USPN 5,272,307 to Jones in view of USPN 5,906,364 to Thompson et al and in view of USPN 5,884,906 to Morse. AAPA describes (Specification, Background of the Invention) well known laser machining such as transmission welding. Jones describes (Front Page Figure and Abstract) clamping of multiple lead connections and transmission bonding through hold down plate 12. Thompson et al describe (Abstract) evenly supporting a workpiece and describe (paragraph beginning column 1, line 63) use of multiple adjustable support

Art Unit: 1725

pins. Morse discloses a workpiece support comprising multiple jaws which can accommodate multiple and various workpieces. The use of plural adjustable supports and a transparent clamp element would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because the transparent clamp is very well known and because both multiple workpieces and adjustable supports are well known in work holding arts. The use of transparent tape strips are known in the laser bonding art and the use of a transparent tape with a transparent clamp would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because the tape provides flexible workpiece support. Preloaded workpiece carriers are well known and substituting an unworked carrier for a worked carrier would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because it speeds processing. Correspondingly shaped air openings in plural plates would have been obvious in order to provide repeatable assembly of subsequent plates.

#### ***Allowable Subject Matter***

Claims 19, 21, 23, 24, and 32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

Applicant states the examiner relied on the specification as prior art in the last rejection. Examiner notes that the three secondary references used in the rejection under 35 USC 103 were drawn to laser processing of clamped workpieces. Applicant's

further arguments with respect to the amended claims have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
